Spent flowers

SIZE: 1-3 m tall.

LEAVES: Bright green and shiny above, paler below, 8-15 cm long and up to 7 cm wide. Egg-shaped (ovate) with smooth or wavy leaf edges that narrow to a point. Paired (opposite) or circularly arranged (whorled) around the stem.

STEM: Gray-brown coloured (green-brown when young). Twigs round and marked with light, slightly raised pores (lenticels).

FLOWERS: On flower stalks (pedicels) that emerge from where the leaf attaches to the stem (axil). At the top of the flower stalk there is a sphere (2-4 cm wide) covered with many small, white 4-petaled flowers (5-8 mm long petals) that have long styles with swollen yellow tips (stigmas).

FRUITS: Round, 5 mm wide, splits into 2 or 4 brown nutlets.

NOTES: The top of this shrub can get chopped off by ice scour. Look for small plants along the shore as well.

Habitat:

Lake and river shorelines and wetlands (swamps, bogs).

Interesting point: Its name comes from the unopened flowers looking like buttons.

Similar species: None.
